GOAL:

Pass the AP Calculus BC Exam
Tuesday May 9, 2017

Ask questions and participate! Every single one of you can do this or you wouldn't be here ☺

Don't cram for quizzes & tests... It won't work in college, & it won't work here.

Do your bookwork! It won't always be collected, but I will never assign a problem unless I know you will need it.

Be prepared for class with materials. Please have your calculator & book with you every day.
