

Name: _____

Unit 3 Scatter Plots and Correlations by Hand Notes

Look at the following scatter diagrams and state which of the following conditions you think is true for each diagram.

- a) High Linear Correlation
- b) Moderate Linear Correlation
- c) Weak Linear Correlation
- d) No Linear Correlation
- e) State if the correlation is positive or negative

The number of workers on an assembly line varies due to the level of absenteeism on any given day. In a random sample of production output from several days of work, the following data were obtained, where x = the number of workers absent from the assembly line and y = the number of defects coming off the line.

x	3	5	0	2	1
y	16	20	9	12	10

- Draw a scatter plot diagram for the given data.
- Draw a straight line that you think best fits the data.
- Would you say the correlation is low, moderate or high? Positive or negative?

Do heavier cars really use more gasoline? Suppose that a car is chose at random. Let x be the weight of the car (in hundreds of pounds), and let y be the miles per gallon (mpg). The following information is based on data taken from *Consumer Reports* (vol. 62, no. 4)

x	27	44	32	47	23	40	34	52
y	30	19	24	13	29	17	21	14

- Draw a scatter plot diagram for the given data.
- Draw a straight line that you think best fits the data.
- Would you say the correlation is low, moderate or high? Positive or negative?

Name: _____

Unit 3 Scatter Plots and Correlations by Hand Homework

Suppose you are interested in buying a new Chevrolet Cavalier. You see the list price on several models with a variety of optional equipment. You wonder what the dealer invoice price is for each model. Let x be the list price (in thousands of dollars) for a random selection of Chevrolet Cavalier vehicles of different models and options. Let y be the dealer invoice (in thousands of dollars) for the given vehicle.

x	10.9	11.2	12.3	13.4	17.9	14.5
y	9.5	10.5	10.9	12.4	15.9	12.2

- Draw a scatter plot diagram for the given data.
- Draw a straight line that you think best fits the data.
- Would you say the correlation is low, moderate or high? Positive or negative?

The following data are based on information from Domestic Affairs. Let x be the average number of employees in a group health insurance plan, and let y be the average administrative cost as a percentage of claims.

x	3	7	15	35	75
y	40	35	30	25	18

- Draw a scatter plot diagram for the given data.
- Draw a straight line that you think best fits the data.
- Would you say the correlation is low, moderate or high? Positive or negative?
